SPOT SATELLITE PROGRAMMING REQUEST

GENERAL CONDITIONS

After analysing your PR parameters, Spot Image will send you a **Programming Proposal**. Once you have approved the parameters defined in the proposal, you are contractually bound to purchase the products corresponding to all requested scenes successfully acquired by the satellite.

PROGRAMMING SERVICE

❑ Standard programming service

This option allows you to request specific image acquisitions if you cannot find what you need in the catalogue.

It is particularly suited to applications that do not require images to be acquired within specific time windows or at extreme viewing angles.

❑ Priority programming service

This option guarantees high-priority image acquisition after analysis of available satellite capacity and previous commitments. Spot Image then commits the necessary satellite programming resources.

This option is particularly suited to applications that are subject to urgent time constraints or require full coverage of an area under specific conditions.

Please refer to the Spot Products & Services price list for the price of standard and priority programming services.

THEME

This section is important. You must specify your exact thematic requirements so that Spot Image can make an accurate assessment of your PR.

1 ❑ Agriculture
2 ❑ Planning, land use / landcover
3 ❑ Cadastral mapping
4 ❑ Cartography & Topography
5 ❑ Monitoring & surveillance
6 ❑ Environment
7 ❑ Coastal and ocean studies
8 ❑ Geology, mineral and oil exploration
9 ❑ Natural hazard and pollution monitoring
10 ❑ Nature reserve management and planning
11 ❑ Water resources
12 ❑ Flight simulation
13 ❑ Forestry
14 ❑ Telecommunications
15 ❑ Urban planning
16 ❑ Other:.....

SURVEY PERIOD

❑ Single Period Survey start ..... / ..... / ..... (day month year) end ..... / ..... / ..... (day month year)

❑ With multiple survey

Within the single observation period, the number of times the area should be covered: .....

If necessary, interval between 2 cloud-free scenes acquired (dead period) : .....days

❑ Multi-Date Survey

First period	Second period	Third period
start ..... / ..... / .....end ..... / ..... / ..... (day month year / day month year)	start ..... / ..... / .....end ..... / ..... / ..... (day month year / day month year)	start ..... / ..... / .....end ..... / ..... / ..... (day month year / day month year)

RESOLUTION & SPECTRAL MODE

Resolution: ❑ 2.5 m ❑ 5 m ❑ 10 m ❑ 20 m

Spectral mode: ❑ Black & White ❑ Colour 3-band ❑ Colour 4-band (SWIR)

The 2.5-m and 5-m colour products are available in 3 bands only and concern SPOTView products exclusively.

SURVEY METHOD

❑ Near-vertical (± 12°) ❑ Unspecified oblique viewing (± 31°) ❑ Cross-track (acquisition) stereopairs

LATERAL STEREOPAIRS FEATURES

(concern HRV or HRG instruments)

Maximum interval (ΔT) between acquisition dates: ..... days

Minimum B/H ratio : .....

Max. viewing angle : .....

Max. acceptable cloud cover per pair ..... % (default value is 10%)

SURVEY AREA

Geographical name of target area: Country..... Placename .....

❑ Polygon ❑ Mapframe ❑ Circle

❑ 30' x 30' ❑ 15' x 15' ❑ 7'30 x 7'30

Geographic coordinates of vertices (sexagesimal degree)

	Latitude			Longitude		
	N/S	Degrees	Minutes	E/W	Degrees	Minutes
1	.....	.....	.....	.....	.....	.....
2	.....	.....	.....	.....	.....	.....
3	.....	.....	.....	.....	.....	.....
4	.....	.....	.....	.....	.....	.....
5	.....	.....	.....	.....	.....	.....
6	.....	.....	.....	.....	.....	.....
7	.....	.....	.....	.....	.....	.....
8	.....	.....	.....	.....	.....	.....
9	.....	.....	.....	.....	.....	.....
10	.....	.....	.....	.....	.....	.....

Centre of circle (sexagesimal degree)

Latitude		
N/S	Degrees	Minutes
.....	.....	.....
Longitude		
E/W	Degrees	Minutes
.....	.....	.....

Cercle radius

..... km

Your requirements may be defined as a **MapInfo file (maximum 99 vertices)**.

CLOUD COVER

❑ Less than 10%

If you do not specify which option you prefer, Spot Image will end satellite programming as soon as the required scenes have been acquired with less than 10% cloud cover.

❑ Cloud-free warranty

If you require imagery that is completely free of cloud, fog, haze, dust clouds and sandstorms, choose the "cloud-free warranty" option.

This service is offered after a feasibility study, and is subject to the programming of your images with priority service.

ADDITIONAL INFORMATION
